5.1 Extinguishing media

Dry agent, carbon dioxide or foam. Prevent contamination of drains and waterways.

5.2 Special hazards arising from the substance or mixture

Highly flammable. May evolve toxic gases (carbon oxides, hydrocarbons) when heated to decomposition. Vapour may form explosive mixtures with air.

5.3 Advice for firefighters

Evacuate area and contact emergency services. Toxic gases may be evolved in a fire situation. Remain upwind and notify those downwind of hazard. Wear full protective equipment including Self Contained Breathing Apparatus (SCBA) when combating fire. Use waterfog to cool intact containers and nearby storage areas.

5.4 Hazchem code

None allocated.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Wear Personal Protective Equipment (PPE) as detailed in section 8 of the SDS.

likelihood of contact with the contents is reduced.

SDS Date: 16 Jan 2024

Revision No: 1

Information available for the ingredients:

Ingredient	Oral LD50	Dermal LD50	Inhalation LC50
ETHANOL	3450 mg/kg (mouse)		20000 ppm/10 hours (rat)
ISOPROPYL ALCOHOL	> 2000 mg/kg (rat) (AICIS)	> 2000 mg/kg (rat) (AICIS)	> 20 mg/L (rat) (AICIS)

CARBON BLACK	> 10,000 mg/kg (rat)		

Due to product form, adverse health effects via skin contact are not anticipated. However, prolonged or Skin

repeated contact may result in irritation, rash and dermatitis.

Exposure to contents is considered unlikely. Due to product form and nature of use, the potential for Eve

exposure is reduced. However, if unit is damaged contact may result in irritation and serious eye damage.

Sensitisation Not classified as causing skin or respiratory sensitisation.

Mutagenicity Not classified as a mutagen.

Carcinogenicity Not classified as a carcinogen. Carbon black is classified as possibly carcinogenic to humans (IARC Group

2B). However, due to product form (ie. enclosed) the risk of exposure is greatly reduced.

Reproductive Not classified as a reproductive toxin.

STOT - single exposure

Over exposure to vapours may result in irritation of the nose and throat, with coughing. High level exposure

may result in dizziness, nausea and headache. Product form reduces the potential for over exposure.

STOT - repeated

exposure

Not classified as causing organ damage from repeated exposure. However, repeated exposure to some

solvents have been reported to cause adverse effects to the central nervous system (CNS).

Not classified as causing aspiration. **Aspiration**

16. OTHER INFORMATION

Additional information

WORK PRACTICES - SOLVENTS: Organic solvents may present both a health and flammability hazard. It is recommended that engineering controls should be adopted to reduce exposure where practicable (for example, if using indoors, ensure explosion proof extraction ventilation is available). Flammable or combustible liquids with explosive limits have the potential for ignition from static discharge. Refer to AS 1020 (The control of undesirable static electricity) and AS 1940 (The storage and handling of flammable and combustible liquids) for control procedures.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:

The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as form of product, method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

HEALTH EFFECTS FROM EXPOSURE:

It should be noted that the effects from exposure to this product will depend on several factors including: form of product; frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.
